In regard to claims 13 and 15, the prior does not disclose a solid-state image pickup apparatus with the combination of limitations specified in the claimed invention, specifically the limitations of:

“edge sides of said solid-state image pickup device chip and those of said hermetic seal portion being substantially coincident with each other;

wherein a wiring region or an electrode pad region is formed from an electrode pad provided on said solid-state image pickup device chip via said bump and said metal wiring to a side surface or through the side surface to a back surface of said solid-state image pickup device chip so that an external terminal can be electrically connected to the wiring region or the electrode pad region”, as claimed in claim 13.
